

SAGNIK BASU

PERSONAL DATA

DATE OF BIRTH: 20 March 1995
ADDRESS: Bengaluru, Karnataka
PHONE: +91-9606570921, +91-9437026477
EMAIL: sagnik.basu@outlook.com
GITHUB NAME: [sagniknitr](https://github.com/sagniknitr)

EDUCATION

2013-2017 B.Tech. (8th semester), ELECTRONICS AND COMMUNICATION ENGINEERING, ,
National Institute of Technology Rourkela
CGPA: 8.00/10.0

WORK EXPERIENCE

- | | |
|----------------------------|--|
| <i>June 2019- Current</i> | Senior Engineer at Samsung Research Institute-Bangalore
<i>Sub-Group :- System-LSI/Multimedia</i>
Contribute to compiler and algorithm kernel software stack for Samsung Neural SDK . Have developed middle-end optimization passes for efficient vector intrinsics generation, deep learning operators, register allocation and tensor data compression. |
| <i>Sep 2017- June 2019</i> | Software Developer at Visteon Corporation
<i>Sub-Group :- Advanced Driving Assistance Systems</i>
Part of the team to develop Computer Vision Software Stack on Drivecore platform (Qualcomm SNPE and Hexagon DSP) for Autonomous Driving. Successfully deployed lidar and camera based highway Lane detection system and Traffic Sign Recognition system for a major Chinese OEM. Demonstrated strong understanding in optimizing training and inference of CNN architectures like network compression, architecture search, quantization etc. |
| <i>May-July 2016</i> | Research Intern at SPACE APPLICATIONS CENTRE, ISRO, AHMEDABAD,
<i>Sub-Group :- On-board Digital Signal Processing Systems</i>
RTL design of channel estimation algorithm for DVB-RCS satellite protocol. Testing was done in Xilinx Virtex 5, USRP B210 and Zynq based FPGA development kits. Gained exposure to FPGA development cycle and tools like Xilinx Vivado, ChipScope etc. |
| <i>May-June 2015</i> | Research Intern at IIT ROORKEE,
<i>Sub-Group :- Image processing and Machine Learning Lab</i>
Study of fundamentals of image processing and Machine Learning. Implemented an algorithm on fuzzy classification of Breast Cancer Data-set, in Matlab |

RESEARCH PROJECTS

September 2016-April 2017

Intelligent Wear-ables Based on IoT and Cognitive Radio Technology
Department of Electronics and Communication, NIT Rourkela

A proof-of-Concept wearable system based on IEEE 802.11-af (TV White Space) specifications. Worked on ARM8(Raspberry Pi 3) and ARM11 (MediaTek Linkit One) processors and NI USRP B210(Software Defined Radio) for real-time applications. The project is funded by IEDC, India. It was also chosen by our department to participate in our Institute's Gold Medal Award for best B.Tech Project

January 2015-April 2017

Vision based Path Planning of a AUTONOMOUS UNDERWATER VEHICLE
Department of Mechanical Engineering, NIT Rourkela

Designed the path planning module of the AUV using a stereo camera and Inertial Navigation sensors. Study and develop PID based control algorithms for stable motion and sensor fusion for perception. All coding is done on C++, ROS, and Qt platform and were optimized for GPU using CUDA-C. Our vehicle participated in the [NIOT SaVe](#) competition 2016 and [Singapore AUV competition, 2018](#). Conference Paper on our vision system was submitted and got selected at [IEEE ICSIPA 2017](#), Malaysia

May 2015-April 2016

Development of Embedded System for a BALLOON SATELLITE
Department of Electronics and Communication, NIT Rourkela

I was in charge of developing the embedded Sensor and Communication Subsystem of the Balloon Satellite. I worked on a 900 Mhz ZigBee trans-receiver known as Xtend and ARM-based microprocessors on UDOO Single Board Computers. Also, a Python-based software stack was developed to monitor the critical communication protocols like image transfer, sensor data transfer, etc

ACHIEVEMENTS

Bachelor Thesis nominated to represent Electronics department for [Best Project Award Quarter Finalists](#) in Texas Instrument's India Innovation Challenge 2017
[Third](#) and [Second](#) positions at Autonomous Underwater Vehicle Competitions.

TECHNICAL SKILLS

Programming Languages:	C/C++, Python, Rust, TypeScript
Simulation Softwares:	Matlab, NI LabView, GNU Radio
Operating Systems:	Linux, QNX RTOS. Android (v10, v11)
Embedded System Software:	ARM Keil, Xilinx Vivado, Synopsys ChessDE
Source / Version Control :	git, IBM Rational-Team-Concert, Jira, Polarion.
Other :	ROS, OpenCV, Caffe, OpenCL, Tensorflow-Lite, Halide/LLVM
